PROFESSIONAL EXPERIENCE

Trove Finance Technologies, Lekki Phase 1, Lagos Nigeria

July 2021 – Present

Software Engineer [Mobile] / Flutter Team Lead

- Implement UI designs, code and maintain the user experience of the Trove mobile application.
- Bring expertise in architecture and design process, drive refactoring of legacy code to improve architectural design.
- Created a custom camera module to reduce mobile application dependencies on external plugins.
- Draft, publish and maintain technical documents for reference in future maintenance and updates.
- Participate in code reviews, write unit, widget and integration tests to ensure code quality.
- 1 of 3 employees to be awarded the 2021 CTO and HOE award for excellence, innovation and diligence.
- Enhanced the trove mobile application features to effectively fix bugs, optimise efficiency and reliability.

Microtel Systems, Victoria Island, Lagos

March 2020 – February 2021

Software Engineer [Mobile]

- Worked with other software engineers to build reusable and efficient user experiences with clean and scalable code.
- Built integration with third party API and tools and managed project priorities, deadlines and deliverables.
- Contributed to product development processes and brain-storming sessions.
- Maintained and improved client database utilising strategic methodologies that efficiently analyse the client's database and develop mapping specifications.
- Modified web pages to optimise the page performance for faster loading and browsing.

Papercode Technologies, Ikota-Lekki, Lagos

October 2018 – March 2020

Software Engineer

- Worked with a cross functional team of UI software engineers, STE, product and program members to vet requirements, designs and proof-of-concepts.
- Developed a logistics delivery mobile application that allows users to request for riders to pick up their items to be delivered to a specific location.
- Worked within an Agile team to complete code reviews, sprint planning and backlog grooming.
- Migrated an existing mobile application from an outdated version to a null safety version using Flutter.
- Identified and corrected bottlenecks and fixed bugs in the mobile application for a shipping web service.
- Proficiently troubleshoot issues raised in assigned projects, achieving a 90% customer satisfaction rate.
